

Comenius Project 2009 – 2011: Think global – act local

Kopernikus-Oberschule Berlin, Bezirk Steglitz-Zehlendorf

Germany:

The territory of Germany covers about 357 square kilometres. There are about 82 million inhabitants. Our capital is Berlin and Berlin is one of sixteen states (“Länder”) of Germany.

Berlin:

Berlin has about 3.5 million inhabitants. It is the largest city in Germany. Our school is located in the the south-west of Berlin, in the district of Steglitz-Zehlendorf. In our region we have many plants and a lot of water – that's why Berlin is really green. The rivers Havel and Spree, the lakes and the forest dominate in the south of the district. Have a look at our flag and you will see it. The most famous forest is “Grünwald” and a well-known lake is “Wannsee”. We have a lot of areas to relax!

Kopernikus-Oberschule:

Our school is a comprehensive school. It starts at the level of seventh grade. This means that the pupils are at the age of twelve or thirteen. They stay at our school for four years at least . Then they have the opportunity to continue their school education for three more years and achieve the general qualification for the university, the so called „Abitur“.

For more details see our homepage: <http://kopernikus.be.schule.de/>

On the left you see the four buildings of our secondary school.

Our highschool is located in another street of Berlin-Steglitz-Zehlendorf.

Pupils at our school like to work at the PC – during lessons and in their free time. So we'd like to get in touch with others on the Internet and we are looking forward to reading some e-mails of the other Comenius partners! Please write us!

There are four teams in the Comenius Project of 2009 - 2011:

TEAM 4: class 8.21 (teachers: Karin Dieckbreder-Schmidt, Kristian Jarolin)

TEAM 5: Natural science group with Dörten Kuckulies

TEAM 6: class 9.21 (teacher: Mohammad Makki)

TEAM 8: “Arbeitslehre” (home economics) group with Silke Bartsch
